Ensuro is dedicated to maintaining transparency in all fees and charges associated with the Ensuro Protocol. Below is a detailed breakdown of the fee structure applicable to participants. This information is also accessible within the Ensuro app interface at [app.ensuro.co](https://app.ensuro.co) and our [Terms of Service](#).

## Fee Structure

- **Underwriting Fee:** Up to 10% of the premium capital earned by the pool, applied at the time a risk is underwritten.
- **Blockchain Transaction (Gas) Fees:** Variable fees paid by the user during interactions with smart contracts, dependent on blockchain network congestion.

All fees are processed transparently via smart contracts, allowing users to track them in real time.

## Changes to the Fees & Charges

If we make any material changes a notice may be posted on this page along with the updated Fees & Charges structure, and an email notification will be sent to our Liquidity Providers prior to the change becoming effective. We encourage you to periodically review this page for the latest information on our Fees & Charges.
